Application Programming and Interaction Design:

Worked on projects that made use of Node.js, NextJS, Supabase, ShadCN, Material UI, and React. Additionally, learnt version control with Git and testing with Jest.

PROFILE

As a passionate and dedicated software developer and designer, I thrive on creating impactful solutions in my work. My experience spans across diverse international settings in Estonia and Kenya, enriching my ability to contribute unique perspectives to different project. I excel in both individual and team environments, bringing a collaborative spirit and a problem-solving mindset as showcased in my work experiences. My passion lies in cloud computing, big data, and machine learning—areas I am deeply passionate about. I am particularly driven by the potential of these technologies to advance environmental conservation efforts.

WORK EXPERIENCE

KODALLY - Estonia

MAR 2024 - JUNE 2024

User Research intern/ Designer

- Worked in a team of 5 to design and develop a promotional tool in the form of a mobile application that allows shop owners in malls to market their products and services through discounts and promotions and for consumers who want discounts and promotions to access these products and services. Also mall owners increase their traffic.
- Designed screens to be implemented for the mobile application.
- Assisted with the development of the design system used for the project
- Conducted research on the market to be explored.
- Conducted research on the best design principles the project can utilize.
- Conducted research on the project's target audience to tailor the final product to their needs and wants.

GERTRUDES'S HOSPITAL - Kenya

FEB 2023 - APR 2023

IT Intern

- Testing the new developed systems to identify functional modules.
- Conducted user training sessions on the new system features and best practices, improving staff efficiency in utilizing hospital system.
- Provided essential IT support to hospital staff by troubleshooting hardware and software issues, resulting in reduction in IT-related downtime.
- Attended training seminars to learn about the new system functionalities and features.
- Presented a weekly report on what we had learnt and the skills acquired.
- Supervised and trained the staff on how to use the new hospital system.
- Cross-checking if the migration of all insurance schemes from the old to the new system was done correctly and if all the details were set right.
